

You will be the first to receive the gift of great coffee!

The Espro™ Press

www.espro.ca

The Espro Press is a precision coffee brewer, similar to a French Press (also known as a cafetière or plunger), but with a two-stage micro-filter that preserves all the freshly brewed flavors and aromas, while keeping sediment out of your cup.

It makes 30 oz of great coffee, and the stainless steel vacuum insulated double walls keep it hot.

By pre-ordering, the giver of this gift is helping you fund this important innovation.
